

# Modeling Marine Ecosystems With Virtual Reality: Ocean Food Web Module Worksheet #4

## Monterey Bay Biomass Data

Species	Biomass in 2044 (metric tons)	Prey/Predator Biomass Ratio	Trophic Level*
Blue Whale			
Orca			
California Sea Lion			
Sardine			

\* For trophic level, use relative terms such as “high”, “medium”, “low”, “highest” and “lowest”.

### Virtual “Dive” Location:

- West Coast region
- Monterey Bay
- kelp forest habitat
- use the default “Baseline” scenario dataset
